PodoSept is a ready-to-use, quick-acting disinfectant.

For preventive disinfection of feet, soles and footwear, including rental replacement shoes. It has strong bactericidal, antiviral and fungicidal activity. At the same time, it refreshes and prevents unpleasant odors. For non-professional and professional use.

Do not use the product as a medicine!

Recommended for use in hospitals, nursing homes, social centers, shower rooms, swimming pools, changing rooms, study rooms, saunas, offices, physiotherapy, pedicure and podiatrist offices. Ideal for medical, catering, nursing, educational and sports staff. After a long day of work, apply by spraying on the skin and in the shoes.

USAGE:

Preventive feet disinfection:

Spray evenly on the upper, lower part of the foot, nails and between the toes, lightly moistening and rubbing into the skin.

Allow the product to act for 30 seconds and allow to dry. Treat as needed 1-2 times a day, for example before and after use of replacement shoes, after visiting a public sauna, gym or swimming pool, starting / completing wet work, etc. If, despite using the product, you suspect a fungal infection, seek the help of a dermatologist to initiate appropriate treatment. Do not use on open wounds!

Preventive disinfection of footwear:

Spray the inside of the shoe evenly, wetting the surface evenly. Allow the product to dry.

Treat as required, for example, once a day in the evening after removal or before and after changing of rented footwear, or according to an approved disinfection plan.

BENEFITS OF USING:

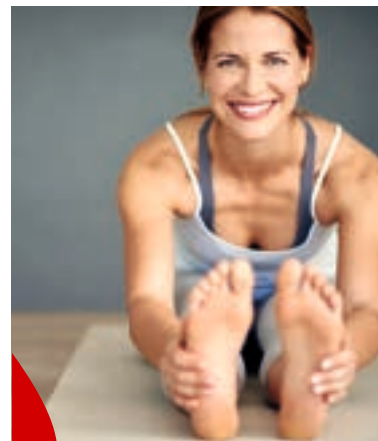

- Kills fungi • Kills bacteria • Prevents infection • Refreshes and cools the feet
- Disinfect shoes • Eliminates unpleasant odors • Reduces sweat secretion • Safe and easy to use

THE COMPOSITION:

100 g of product contains: alcohols [ethanol, isopropanol] 75g, chlorhexidine gluconate 2g
